EDUCATION

Universidad De Ibagué

Systems Engineer - 2020 - 2025

• Student representative - 2023

SENA

Systems technician - 2019

WORK EXPERIENCE

Software Developer

Seapto S.A., Feb 2024 - Present

- I led the design, development, and implementation of scalable web solutions, including the platform for the Employee Fund (FEMSEAPTO) and the "El Rifetón" legal raffle sales system.
- I designed and developed the complete architecture for the company's intranet, optimizing the central database load and dividing business logic into microservices.
- I designed and implemented CI/CD (Continuous Integration/Continuous Delivery) pipelines and Docker on existing projects.
- I implemented and managed the Scrum methodology for the development cycle, using GitHub Projects, branch protection, and Pull Requests.
